

ViewPoint

Connect. Report. Relax.

GE Healthcare makes ultrasound workflow quicker and easier with ViewPoint. The first truly comprehensive data management solution for the OB/GYN office, ViewPoint combines the reporting and image archiving capabilities you need with the experience and support of the industry leader.

Connect.

Think of ViewPoint as *the* window to all your patient data, connecting you with the information you need, whenever and wherever you want it.

- Save time and ensure accuracy by transferring data directly from your ultrasound scanner
- Save paper costs by storing images via DICOM
- Enhance your workflow by exchanging patient, scheduling and report data with EMR or HIS/RIS

Whatever the requirements of your practice, GE's experts can help you design a solution to fit your needs.

Report.

With ViewPoint, you can quickly produce reports for both routine exams and complicated cases. Drawing on the experience of hundreds of clinicians, our innovative structured reporting technology speeds report creation while capturing all of your data for statistical analysis. You can even review and analyze volume data sets with our exclusive 4DView and TruAccess™ plug-ins.

Relax.

At the end of the day, ViewPoint ensures you can relax with the knowledge that reports are complete and all of your records and images are securely stored and accessible. You'll also enjoy the experience, service and support of a focused team within the world's leading ultrasound and IT provider. Be confident in the future knowing GE's annual technology breakthrough strategy ensures you always have the latest innovations.

ViewPoint offers:

- Scalable software and turnkey solutions
- One-click data transfer for measurements and images
- Compatibility with multiple brands of ultrasound scanners
- Robust DICOM image archiving, including cine clips
- Integrated DICOM Worklist
- Streamlined HL7 interfacing for HIS, RIS and EMR
- Easy patient scheduling
- Comprehensive structured reports
- Customizable data mining with statistics
- Innovative Post-processing software (4D View & TruAccess)
- Fax and PDF formatting functionality

Example Configurations

Single workstation

Affordable solution for small office

- Scan, review and report in exam room
- Easily transfer measurement data from your ultrasound system
- Create quick and accurate reports
- Benefit from digital patient records

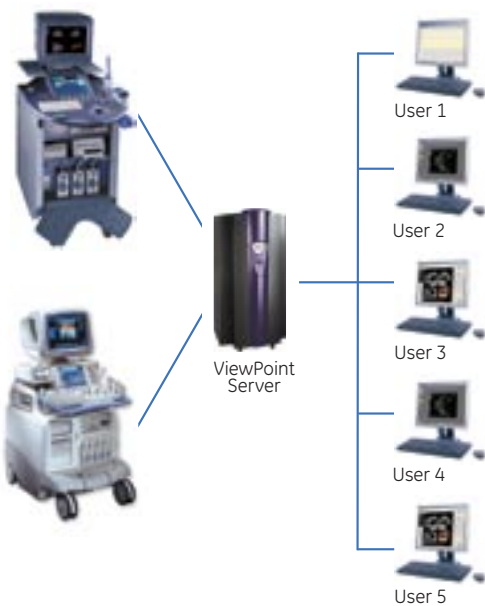

Multiple workstations

Scalable solution for multi-physician practice

- Flexible digital image storage
- Review exams outside scan room
- Link all patient data to a single electronic record
- Connect to patient scheduling
- Transfer measurements and images in DICOM format from ultrasound scanners
- Utilize data-mining of statistics to grow practice via patient and physician marketing

Server-based workflow

Scalable solution for networks, large facilities and multiple departments

- Connect multiple ultrasound scanners to one server or multiple sites to one network
- Exchange patient data with EMR, HIS/RIS and other IT systems
- Use multiple image archiving solutions
- Share patient data and images quickly across network
- Use advanced post-processing applications for off-line volume data set review
- Easily data mine with statistics module for accreditation and research
- Enjoy flexible workflow and enhanced productivity by reading exams off-line
